WALT

WALT: identify viewpoint and explore the impact.

close to stop washing his paws and spring out of Lizziebeth's lap, yowling in his fury. It wasn't his gentle meow, this was his wailing war cry, and it was shrill and loud, horribly loud. For a moment or two there was silence outside the door. Then, "A cat! As I live and breathe, a cat!" cried Skullface. "Johnny Trott's got a cat in his room! How dare he? How dare he? It's against the rules, my rules!"

I looked aghast at Lizziebeth. Without a moment's hesitation she picked up Kasper, and dumped him unceremoniously in my arms. "In the wardrobe," she whispered. "Get in the wardrobe. Quick!"

I saw Johnny losing about Proffers up on his pillows, I was lying there at the bottom of his lashed bed, looking at Lizziebeth's deadly dawn picture of the Titanic. Full steam ahead! I could sense I would be going on it soon as I could not live with anymore being a Seckate, I have had enough. I staked stayed at the picture. My last I urched as I could hear footsteps, I leaped into Johnny's car, miraculously distraughtly, addressing the door. Chased over like an angry tiger.

task: Identify there are many different types and sizes of a local habitats
Title

To ~~persuade~~ persuade Mrs Potter to let us have a pond in the school ground!

Dear Mrs Potter, I'm sorry to bother you but can we have a pond in the school? ✓

⊕ Please can we have one, we are learning about habitats if we didn't have a pond we might have to go to another garden place with clean water to see the fish, frogs, or any water animals.

⊕ Instead of a boring grassy view we could build a pond not a tiny one not a small one not a gigantic one or medium one. please can we have one I beg you so if we have a pond it's a habitat ^{so} we can learn alot more about sea creatures of amphibians. There will ^{probably} be a variety of fish so can we use this waste of space for a pond.

Great-improvement directly this pond will help us more instead of having a sheet of a piece on the board - how about an actual pond it will make it more exciting for us if there isn't it will be boring.

WALT: from the viewpoint of an African animal,

Dear Sir,

Why did you adopt us or is it just take us? You took all us animals away from what we love: our homes, our families and especially our love. You took that away from us. Whilst you sleep in a nice comfy bed, we just lie there on a hard metal floor begging for someone to save us. You chain us as well which is bad enough....and ..and our cages are separate we can't even play as we should be able to.

We are miserable, a never ending misery. I hate that I'm not where I should be. You treat us like us..like a piece of dust. We mean nothing to you. You mean nothing to us and it hurts. I am always heartbroken. I will never not be heartbroken and when we are weak, you just sell us to owners for pets, to road side zoos or laboratories!

You don't even send us back to our real homes where we can eat fresh grass and wash in clean rivers.

It's the worst life anyone could have, so please can you stop this. We all beg you to stop this; even the wild animals still in the wild beg you not to catch them. Stop now!

Xander Sibbick

WALT: solve multiplication problems

Rufus O'Parsley used some of the ingredients below to make a Rascally Cake.

Pick a number card to help him to work out how much of each ingredient he will need.

Pairs of stinky socks

8 spider legs

Rotten eggs - 10 in an egg box

Wiggly worms - 7 in a jar

Crunchy snails - 3 in a pack

Hairy bugs - 6 in a packet

Squidgy squid legs - 9 per squid

Foot with 5 infected toenails

How did you solve these multiplication problems?

- Drawings
- Objects
- Arrays
- Number line jumps
- Counting on (my fingers)
- Other: 1 naoie it

$10 \times 10 = 100$

- $5 \times 4 = 20$ ✓
- $9 \div 1 = 9$ ✓
- $7 \times 3 = 21$ ✓
- $8 \times 0 = 0$ ✓
- $5 + 5 = 25$ ✓
- $3 \times 7 = 24$ ✗
- $6 \times 1 = 6$ ✓
- $10 \times 9 = 90$ ✓
- $5 \times 0 = 0$ ✓
- $9 \times 0 = 0$ ✓
- $7 \times 10 = 70$ ✓
- $10 \times 5 = 50$ ✓
- $9 \times 3 = 27$ ✓
- $8 \times 0 = 0$ ✓

Jack showed how he repeatedly counted groups on number of fingers.

Impressive multiplying Jack. 😊

Please draw an array to check $3 \times 7 = 21$
