

The sun is working its magic in the garden and things are starting to bloom and bud. We have strawberries starting to turn red, and the bean, pea shoots and tomato plants are growing strong. Our seedlings are now ready to be potted on and hopefully by the Autumn term we will have carrots, onions and turnips to make soup with.

We are still on the hunt for any old wellies, plastic lids of all colours and sizes, and the odd car tyre or two to help create our wonderful new garden. If you can help with any of these things please see Miss Gee.
